Czech Republic · Remote / Hybrid
Czech native · English C1 · German A2

Backend developer with **4+ years** shipping reliable data and integration systems on **.NET, Python, and Azure** across pharmaceutical, manufacturing, and full-stack web domains. Currently designing pharma export-ban notification pipelines at Arex; open to senior backend contracts and IC roles.

// 01 EXPERIENCE

Arex Pharma Nov 2024 – Present · Remote
Software Developer

Pharmaceutical regulatory data systems for the German market.

- Designed and shipped an Azure Service Bus + Logic Apps notification pipeline for pharmaceutical export-ban events end-to-end.
- Built async Python scrapers integrating SÚKL and EMA regulatory data into internal .NET systems.
- Built a cross-border pharmaceutical data hub integrating EU national drug registries and pricing into a unified warehouse to enable intra-EU trading.

C# · .NET · Python · Azure (Service Bus, Logic Apps, Functions, AD) · SQL Server · EF Core

Innomotics / Siemens Aug 2022 – Oct 2024 · On-site
Software Developer

Full-stack manufacturing applications.

- Built the Traceability app — Gantt-based production visualizations and logistical order maps across four data perspectives, with significant legacy data cleanup.
- Shipped the Impregnation Station app with Azure AD auth, MQTT + SignalR real-time protocols, and custom recipe adapters for manufacturer specs.
- Developed an ML-based packaging prediction system as a two-service architecture (.NET + Python K-Means) communicating over HTTP.

.NET · Angular · Python · SQL Server · Azure AD · MQTT · SignalR · scikit-learn

Liberty Ostrava Feb 2019 – Aug 2022 · Contract
Full-stack Developer

Web applications and modernization of legacy frontends during studies. .NET · JS · SQL Server.

IDC CEMA Sep 2021 – Dec 2021 · Contract
Data Analyst

Web scraping and automation pipelines for e-commerce product data. Python · pandas.

// 03 STACK

BACKEND C# / .NET, Python, EF Core

AZURE Service Bus, Logic Apps, Functions, AD, Container Apps

DATA SQL Server, MongoDB, pgvector, pandas, scikit-learn

REALTIME / INTEGRATION MQTT, SignalR, MCP, MS Graph

FRONTEND Angular, React / TypeScript, Next.js, Tailwind

TOOLS Git, Docker, Linux / WSL2, OpenTelemetry, .NET Aspire

AI Claude Code, MCP integrations, AI-augmented dev

// 02 SELECTED PROJECTS

Life OS .NET 10 · MCP · pgvector

Personal AI agent with deep memory over private data — local-first, self-hosted. Exposed as both an MCP server and a standalone CLI calling Claude with tool use. Aspire-orchestrated dev (Postgres + pgvector + Ollama); deploys to Azure Container Apps. .NET 10 · MCP C# SDK · Anthropic SDK · pgvector · .NET Aspire

Vzdělej.se Next.js · Live

Czech interactive learning platform for math & physics. Lessons mix multiple-choice, drag-to-sort, text input, and custom interactive visualizations (function graphs, physics simulations).

Next.js 16 · React 19 · TypeScript · Tailwind · KaTeX
